FACTS ABOUT TRANSPLANTATION IN THE UNITED STATES

On September 27, 2019, the OPTN National patient waiting list for organ transplant includes the following:

Registrations					Patients			
_		Active		Total		Active		Total
Waiting for <i>kidney</i>	•	65,235	•	102,934	Waiting for <i>kidney</i>	60,042	•	94,728
Waiting for <i>liver</i>	•	10,346	•	13,274	Waiting for <i>liver</i>	10,177	•	13,039
Waiting for pancreas	•	200	•	832	Waiting for pancreas	197	•	825
Waiting for pancreas islet cell	•	8	•	76	Waiting for pancreas islet cell	8	•	76
Waiting for kidney-pancreas	•	872	•	1,707	Waiting for kidney-pancreas	844	•	1,651
Waiting for intestine	•	145	•	228	Waiting for intestine	145		228
Waiting for <i>heart</i>	•	2,874	•	3,755	Waiting for heart	2,843	•	3,716
Waiting for heart-lung	•	32	•	49	Waiting for heart-lung	32		49
Waiting for <i>lung</i>	•	1,204	•	1,436	Waiting for <i>lung</i>	1,197	•	1,424
Waiting for VCA	•	19	•	19	Waiting for VCA	19		19
TOTAL REGISTRATIONS	•	80,935	•	124,310	TOTAL PATIENTS*	73,873	•	113,087

NOTE: This table shows the total number of registered candidates on the waiting list, as well as the current number of active candidates eligible to be considered for organ offers. Some transplant candidates are temporarily classified as "inactive" by their transplant center because they are medically unsuitable for transplantation or need to complete other eligibility requirements. OPTN policies allow patients to be listed with more than one transplant center (multiple-listing), and thus the number of registrations is greater than the actual number of patients. If a candidate is actively listed at one center and inactively listed at another, only the active listing will be tallied with regards to the unique patient counts (not counted as an inactive patient).

^{*} Some patients are waiting for more than one organ, therefore the total number of patients is less than the sum of patients waiting for each organ.

Numbers of Transplants Performed, 2018**							
. 2	1,167	kidney (no pancreas) transplants	(6,442 living donors).				
•	8,250	liver transplants.					
•	192	pancreas (no kidney) transplants.					
•	835	kidney-pancreas transplants.					
•	104	intestine transplants.					
•	3,408	heart transplants.					
•	32	heart-lung transplants.					
•	2,530	lung transplants.					
•	11	VCA transplants.					
• 3	6.529	TOTAL					

Number of Donors Recovered, 2018**

- 10,721 Deceased
- **6,848** Living
- 17,569 TOTAL

During 2018, 5,478 patients were removed from the OPTN National patient waiting list for reason of death.**

** Based on OPTN data as of September 27, 2019. Double kidney, double lung and heart-lung transplants are counted as one transplant. NOTE: Data subject to change due to future data submission or correction.

As of September 27, 2019, OPTN membership included the following:

- 254 Transplant Centers
- 5 Business Members
- 58 Operating Organ Procurement Organizations (OPOs)
- 147 Histocompatibility Laboratories
- 6 General Public Members
- 14 Medical/Scientific Organizations
- 8 Individual
- 390 TOTAL*

As of September 27, 2019, 254 medical institutions in the United States operate an organ transplant program. These transplant centers can be separated into organ specific programs that include the following active programs:

- 237 Kidney Transplant Programs
- 147 Liver Transplant Programs
- 133 Pancreas Transplant Programs
- 20 Pancreas Islet Cell Transplant Programs
- 20 Intestine Transplant Programs
- 141 Heart Transplant Programs
- 71 Lung Transplant Programs
- 27 VCA Transplant Programs
- 796 TOTAL

Kidney Paired Donation (KPD) Statistics as of September 27, 2019

Participants: In the week of September 23, 2019 there were 147 candidates included in the OPTN KPD matching algorithm. Transplants: During 2018, there were 38 transplants performed in the OPTN KPD program and 933 living donor kidney transplants performed in the U.S. reported as paired donations.

^{*} There are 7 OPTN members that operate both transplant centers and in-house OPOs and 95 that operate both transplant centers and in-house histocompatibility laboratories. These members are included in both the count of transplant centers and operating OPOs. For this reason, the total number of members is less than the sum of the different categories.
